## SUMMARY

**Founder-CTO and hands-on engineering leader building production AI and the teams that ship it.**

15+ years spanning early-stage builds and NASDAQ-scale organizations. I think like a product owner and stay technical enough to challenge a model, interrogate an incident, and keep the trust of the engineers I lead.

I've shipped under real compliance bars throughout my career: SOC 2, HIPAA/CLIA-accredited healthcare infrastructure with zero audit findings, and regulated financial and mortgage data at a NASDAQ company.

As a US citizen based in Barcelona with full EU work authorization, I can join teams on either side of the Atlantic with no sponsorship required.

## EXPERIENCE

### Co-Founder & CTO / Chief Automation Officer · InsidePartners.ai

2020 – Present

Remote · formerly Onit Tech Solutions

- Co-founder and technical lead of an AI automation and fractional-engineering-leadership practice.
- Build production agentic AI hands-on: multi-agent systems, RAG, and MCP integrations.
- Built a real-estate ML decision engine (AppFolio/QuickBooks to BigQuery with a Looker layer) that scores hold, sell, refinance, and renovate per asset on DSCR, LTV, cap rate, and cash-on-cash return.
- Set the standards, governance, and reference patterns for safe AI adoption.
- Representative outcomes: cut a core billing process from three days to four hours; $250K+ in annual savings per engagement.

### Co-Founder & CTO → VP of Engineering · Nymblr

2022 – 2025

Remote · acquired by Inunity

- Built the full platform from the first commit on AWS, including a production ranking and lead-scoring engine serving 135M+ records at sub-second retrieval.
- Reached 3,000+ clients and $50K MRR in 12 months; grew the team from 0 to 15.
- After acquisition, led the technical integration into a live multi-product platform with no customer interruption.
- Ran a cross-continental engineering team (US, India, Europe) through their leaders.

### Head of Engineering · Onemata

2020 – 2022

Denver, CO

- First engineering hire; grew the team from 1 to 15.
- Built a high-volume, event-driven streaming platform on AWS (Kafka, Spark on EMR, ECS) with proprietary data-quality, fraud-detection, and bot-detection algorithms.
- Shipped a self-serve delivery portal that cut client onboarding from 3+ months to under 24 hours.
- SOC 2; $1.2M in annual savings.

### Manager → Senior Manager, Product Development · Altisource

2014 – 2020

Denver, CO + Global · started at RentRange, acquired by Altisource in October 2015 (NASDAQ: ASPS)

- Started at RentRange in 2014 and grew through its acquisition by Altisource in October 2015 into enterprise engineering leadership.
- Directed 50+ engineers across four business units, through directors and managers, on regulated financial and mortgage data.
- Led enterprise cloud modernization to AWS with multi-million-dollar cost reductions.
- Led roughly 7 M&A integrations.
- Led a patented Rental Automated Valuation Model and an automated buy-box, property-matching, and underwriting platform that sourced, valued, and acquired single-family homes for investors at scale.

## SKILLS

**Leadership:** Engineering org design, scaling teams through managers, hiring and coaching, distributed/global teams.

**AI-native engineering:** Multi-agent systems, RAG, MCP, tool/function calling, vector search; AI coding tools; adoption enablement and governance (NIST AI RMF).

**Platforms & scale:** Event-driven and near-real-time systems, Kafka, Spark/EMR, sub-second retrieval, high availability, observability.

**Cloud & data:** AWS and Google Cloud, serverless, containers/ECS, CI/CD, FinOps/cost optimization, BigQuery and Looker.

**Languages & frameworks:** Python, TypeScript/React, SQL.

**Regulated & secure:** SOC 2, HIPAA/CLIA, regulated financial data.

**Product & commercial:** Unit economics, roadmaps, cross-functional partnership, real estate and proptech.

## EDUCATION

**B.S. Management of Computer Systems**, University of Wisconsin-Whitewater, 2011

## LANGUAGES

English (native), Spanish (B2)
